### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Chou (US006574120B1).

Chou's device discloses a retractable extension cord housing (figs. 1-4) having a low-profile plug holder to retractably hold an extension cord (3) that has a proximal end retracted into the extension cord housing, a distal end and a low-profile plug connected to the distal end of the extension cord and having two conducting prongs at 41 separated by a distance and a grounding prong into the socket with an outside diameter, and the extension cord housing comprising: a hollow body having a top, a bottom (1,2), an external surface and an outer edge; and a low-profile plug holder having a plug recess to hold the prong (41) defined in the bottom external surface of the hollow body and the plug recess having a tapered top opening; a bottom a rectangular hole formed in the bottom of the plug recess and having a length that is slightly shorter than the distance between

the two conducting prongs (see plug recess at 2) on the low-profile plug; a circular hole formed in the bottom of the plug recess and having an inside diameter that is larger than the outside diameter of the grounding prong in order to the prong (41); and a cord groove formed in the bottom external surface of the hollow body between the plug recess and the outer edge of the hollow body; wherein the hollow body comprises two half shells (1,2) connected to each other, and the plug holder is formed in one of the half shells.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chou (US006574120B1) in view of Khubani (US00D485744S) .

Chou's device discloses the aforementioned limitations including retaining tab (161) except for the handle. Khubani's device discloses retractable extension cord housing with the handle (see fig. 1). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to add the handle such as the one discloses in Khubani's device in order to easily hand carry the Chou's device.
